Guided dives

Dive packages

Our diving packages are only for certified autonomous divers. Prices are based upon making 2 guided dives per day, night dives not counted. Night dives and boat dives are part of your dive package. However, the additional surcharge for these dives is not included in the package price and will be added to the price on location.

Our diving packages are strictly personal; you cannot share your package with another diver.

The dives include:

- Tank, air & weights
- Guidance of a professional dive guide
- A personal diving bag to transport your equipment
- Spare equipment and First Aid equipment including emergency oxygen are on the dive site at all times ready to be used

Dives

Our dives have a maximum dive time of 60 minutes (45 minutes for night dives) or until a minimum of 50 bars. We do not make decompression dives. Dives deeper than 30 meter can be planned in when noted in advance and only when our planning and the weather conditions allow for it.

Logbook and certification card

Every diver joining our fun dives is expected to produce his logbook and diver certification card to our staff. These items prove the diver's experience and level of certification.

Refresher dive

Divers who have not been diving for 6 months or longer need to start off with a Refresher dive, unless they meet at least two of the following conditions:

- Level of Rescue Diver or higher
- 40 logged dives or more
- Have been diving in the past 12 months

Rental equipment

The basic set of equipment we offer for rent is new and of professional quality.

A basic diving gear includes:

- Mask & Snorkel
- Fins
- Wetsuit
- BCD/ Stab. Jacket
- Regulator set including: alternative air source, depth gauge & Submersible pressure gauge

Additional equipment such as a dive computer, compass, torch, optical glasses, etc. are also available for rent. For these items an additional rental price is charged per dive.

Dive computer

Certified divers who want to dive deeper than 18 meters are required to use a dive computer.

Using own equipment

Divers bringing their own diver equipment are expected to have it in a good state. Make sure your gear is working properly and is serviced on time. Private gear will be checked by one of our trained staff members for good functioning. If our staff believes that a diver's private equipment is not working properly or is not well maintained, we will not allow this diver to dive with us using this equipment. In this case the diver will be offered to rent equipment from the school instead (at an extra cost). We are also certified professional service technicians for the brands Mares and Aqualung/Technisub, so for these brands we can also offer a quality service.

This measure is to ensure and protect the safety of both our guests as well as our guides.
